

STAIⁱNGER

GLASS

ELEGANT GLASS DESIGNS

STAINER GLASS HAS BEEN INVOLVED IN SUPPLYING **HIGH QUALITY INNOVATIVE GLASS PRODUCTS** SINCE 1989.

One of our key policies is to supply environmentally friendly products where possible.

Stainer Glass provides a comprehensive and professional service, from initial design and survey through to project management and site installation by our experienced teams.

All of our installations meet the current safety legislation.

Sit back, relax and let us do the work that will turn your concept into glass reality.

Splashbacks & Worktops

Simple but sophisticated, our comprehensive range of glass splashbacks and worktops provides an eye-catching, practical, hygienic and durable alternative to tiles.

Shower Cubicles, Screens & Wetrooms

The perfect combination in form and function, glass creates a space that is tranquil and contemporary with a light and spacious feel.

Floors, Stairs & Balustrades

Bringing stunning architectural glass design technology into the home, glass floors, stairs and balustrades epitomise contemporary internal design.

Laminated Glass

Laminated glass is manufactured by encapsulating a decorative interlayer between two or more panes of glass.

The decorative interlayer can incorporate many different materials such as: coloured film, fabric, silk, muslins, wood veneers, grass and leaves, cracked ice and metal mesh.

Kiln Formed Glass

Kiln formed glass has limitless and exciting design possibilities. The glass is heated to near molten state over specially designed moulds, embossing designs and textures to your requirements.

Specialist Sandblasting

Sandblasting is a versatile form of glass etching which can transform a clear glass panel.

By etching the surface of the glass we can create logos, text, patterns, plus carved textures and etched fades, with very fine detailing being achieved by stencilling.

Our state of the art automated sandblasting machinery allows us to produce large panels to the highest of standards.

ThinkGlass Specifications

Combining function and art, our range of **ThinkGlass** countertops can transform your home.

- A minimum thickness of 36mm
- A smooth, glossy contemporary finish with a wide choice of textures.
- Custom designs of infused colour to create a personalized touch.
- Individual pieces up to 2130 x 3048mm

Colours

- Crystal: This is a low iron glass which provides exceptional light transmission.
- Aqua: The natural and inherently green colour of glass.

Edge Finishes:

- Polished: Sleek and modern, providing the depth only available with thick glass.
- Brushed: A modern, unique and linear design.
- Artistic: Personalize your glass countertop by adding the magical touch of our glass artist.

LED Lighting

White, True White, Multicolour, Cold White, Amber, Red, Fuschia, Blue, Cyan, Green.

Thinkglass countertops are manufactured by **ThinkGlass inc.** Boisbriand, Quebec, Canada for further information please visit www.thinkglass.com

ThinkGlass Textures

Natura
A beautifully organic feel created by the gentle flow in the patterns.

Granula
Similar in texture to Natura finish, but with a more uniform flow in the pattern.

Craco
A soft texture with sporadic lines resembling a natural crackling effect.

Fossila
A rugged texture with a unique feel.

Brossa
Sweeping brush strokes creating a soft directional pattern.

Dropa
Like freshly fallen raindrops creating a unique water like pattern.

Vaga
A wave like pattern that resembles the sea.

Pauma
Small indentations creating an unusual pattern for unique spaces.

Herma
Heavily textured with cracks and chunks.
